

# Example 1 Bank Schema Branch Customer

Every academic discipline or field, in creating its terminology, thereby lays the groundwork for an ontology. Each uses ontological assumptions to frame explicit theories, research and applications. Improved ontologies may improve problem solving within that domain...

Data model

*and relationships found in a particular application domain: for example the customers, products, and orders found in a manufacturing organization. At*

A data model is an abstract model that organizes elements of data and standardizes how they relate to one another and to the properties of real-world entities. For instance, a data model may specify that the data element representing a car be composed of a number of other elements which, in turn, represent the color and size of the car and define its owner.

Strasbourg tramway

*spaces would deter customers. Meanwhile, the opposition campaigning for the tramway emphasised its cost-efficiency relative to the VAL (1 kilometre of VAL*

The Strasbourg tramway (French: Tramway de Strasbourg, German: Straßenbahn Straßburg; Alsatian: D'Strossabàhn Strossburi(g)), run by the CTS, is a network of six tramlines, A, B, C, D, E and F that operate in the cities of Strasbourg in Alsace, France, and Kehl in Baden-Württemberg, Germany. It is one of the few tram networks to cross an international border, along with the trams of Basel, Geneva and Saarbrücken. The first tramline in Strasbourg, which was originally horse-drawn, opened in 1878. After 1894, when an electric-powered tram system was introduced, a widespread network of tramways was built, including several longer-distance lines on both sides of the Rhine.

Data models are typically specified by a data expert, data specialist, data scientist, data librarian, or a data scholar.

The World Bank defines tertiary education as including universities, colleges, and vocational schools. Higher education is taken to include undergraduate and postgraduate education, while vocational education beyond secondary education is known as further education in the United Kingdom, or included under the category of continuing education in the United States.

Organizational culture influences how people interact, how decisions are made (or avoided), the context within which cultural artifacts are created, employee attachment, the organization's competitive advantage, and the internal alignment of its units. It is distinct from national culture or the broader cultural background of its workforce....

As digital infrastructure becomes more embedded in everyday life, cybersecurity...

Use of the system declined from the 1930s onwards, and the service closed in 1960 in parallel with many other tramways at the...

Foreign Account Tax Compliance Act

*FATCA does not apply to Banks in Puerto Rico since they are classified as &quot;Territory Financial Institutions&quot;. Nonetheless, customers in Puerto Rico must complete*

The Foreign Account Tax Compliance Act (FATCA) is a 2010 U.S. federal law requiring all non-U.S. foreign financial institutions (FFIs) to search their records for customers with indicia of a connection to the U.S., including indications in records of birth or prior residency in the

U.S., or the like, and to report such assets and identities of such persons to the United States Department of the Treasury. FATCA also requires such persons to report their non-U.S. financial assets annually to the Internal Revenue Service (IRS) on form 8938, which is in addition to the older and further redundant requirement to report them annually to the Financial Crimes Enforcement Network (FinCEN) on form 114 (also known as 'FBAR'). Like U.S. income tax law, FATCA applies to U.S. residents and also to U.S. citizens...

A data modeling language and notation are often represented in graphical form as diagrams.

Ontology (information science)

*the SDC community, amongst other applications (see list on SCDO website). Schema.org, for embedding structured data into web pages, primarily for the benefit*

In information science, an ontology encompasses a representation, formal naming, and definitions of the categories, properties, and relations between the concepts, data, or entities that pertain to one, many, or all domains of discourse. More simply, an ontology is a way of showing the properties of a subject area and how they are related, by defining a set of terms and relational expressions that represent the entities in that subject area. The field which studies ontologies so conceived is sometimes referred to as applied ontology.

Tertiary education

*initially classified all tertiary education together in the 1997 version of its schema. They were referred to as level 5 and doctoral studies at level 6. In 2011*

Tertiary education (higher education, or post-secondary education) is the educational level following the completion of secondary education.

Telephone exchange

*trunks and direct customer dialing. For corporate or enterprise applications, a private telephone exchange is termed a private branch exchange (PBX), which*

A telephone exchange, telephone switch, or central office is a central component of a telecommunications system in the public switched telephone network (PSTN) or in large enterprises. It facilitates the establishment of communication circuits, enabling telephone calls between subscribers. The term "central office" can also refer to a central location for fiber optic equipment for a fiber internet provider.

Market (economics)

*enforcement of contracts. Michel Callon's concept of framing provides a useful schema: each economic act or transaction occurs against, incorporates and also*

In economics, a market is a composition of systems, institutions, procedures, social relations or infrastructures whereby parties engage in exchange. While parties may exchange goods and services by barter, most markets rely on sellers offering their goods or services (including labour power) to buyers in exchange for money. It can be said that a market is the process by which the value of goods and services are established. Markets facilitate trade and enable the distribution and allocation of resources in a society. Markets allow any tradeable item to be evaluated and priced. A market emerges more or less spontaneously or may be constructed deliberately by human interaction in order to enable the exchange of rights (cf. ownership) of services and goods. Markets generally supplant gift economies...

In historical perspective, telecommunication terminology has evolved with time. The term telephone exchange is often used synonymously with central office, a Bell System term. A central office is defined as the telephone switch controlling connections for one or more central office prefixes. However, it also often denotes the building used to house the inside

plant equipment for multiple...

In later years, ICL diversified its product line but the bulk of its profits always came from its mainframe customers. New ventures included marketing a range of powerful IBM clones made by Fujitsu, various minicomputer and personal computer ranges and (more successfully) a range of retail point-of-sale equipment and back-office software. Although it had significant sales overseas, ICL's mainframe business...

The growing significance of computer insecurity reflects the increasing dependence on computer systems, the Internet, and evolving wireless network standards. This reliance has expanded with the proliferation of smart devices, including smartphones, televisions, and other components of the Internet of things (IoT).

Tertiary education generally culminates in the receipt of certificates, diplomas, or academic degrees. Higher education represents levels 5, 6, 7, and 8 of the 2011 version of the International Standard Classification of Education structure. Tertiary education at a nondegree level is sometimes...

A data model can sometimes be referred to as a data structure, especially in the context of programming languages...

International Computers Limited

*withdrew completely from operations in North America. Customers of iBANK Systems included Moscow Savings Bank (Russia), Suprimex (Russia), Chelindbank (Russia*

International Computers Limited (ICL) was a British computer hardware, computer software and computer services company that operated from 1968 until 2002. It was formed through a merger of International Computers and Tabulators (ICT), English Electric Computers (EEC) and Elliott Automation in 1968. The company's most successful product line was the ICL 2900 Series range of mainframe computers.

The corresponding professional activity is called generally data modeling or, more specifically, database design.

Computer security

*etc. or grant physical access by, for example, impersonating a senior executive, bank, a contractor, or a customer. This generally involves exploiting people's*

Computer security (also cybersecurity, digital security, or information technology (IT) security) is a subdiscipline within the field of information security. It focuses on protecting computer software, systems and networks from threats that can lead to unauthorized information disclosure, theft or damage to hardware, software, or data, as well as from the disruption or misdirection of the services they provide.

Organizational culture

*culture. Examples include external/internal, strong/weak, flexible/rigid, and many others. Culture can be externally focused, aiming to satisfy customers, investors*

Organizational culture encompasses the shared norms, values, and behaviors—observed in schools, not-for-profit groups, government agencies, sports teams, and businesses—reflecting their core values and strategic direction. Alternative terms include business culture, corporate culture and company culture. The term corporate culture emerged in the late 1980s and early 1990s. It was used by managers, sociologists, and organizational theorists in the 1980s.
