

Iec 82079 1

List of IEC standards

designations IEC 81714 Design of graphical symbols for use in the technical documentation of products IEC 82045 Document management IEC 82079 Preparation

The International Electrotechnical Commission (IEC; French: Commission électrotechnique internationale) is an international standards organization that prepares and publishes international standards for all electrical, electronic and related technologies. IEC standards cover a vast range of technologies within electrotechnology.

The numbers of older IEC standards were converted in 1997 by adding 60000; for example IEC 27 became IEC 60027. IEC standards often have multiple sub-part documents; only the main title for the standard is listed here.

IEC 60027 Letter symbols to be used in electrical technology

IEC 60028 International standard of resistance for copper

IEC 60034 Rotating electrical machines

IEC 60038 IEC Standard Voltages

IEC 60041 Field acceptance tests to determine the hydraulic...

User guide

requirements for the design of instructions. The international standard IEC 82079 prescribes the required installation topics for an installation instruction

A user guide, user manual, owner's manual or instruction manual is intended to assist users in using a particular product, service or application. It is usually written by a technician, product developer, or a company's customer service staff.

Most user guides contain both a written guide and associated images. In the case of computer applications, it is usual to include screenshots of the human-machine interface(s), and hardware manuals often include clear, simplified diagrams. The language used is matched to the intended audience, with jargon kept to a minimum or explained thoroughly.

Until the last decade or two of the twentieth century it was common for an owner's manual to include detailed repair information, such as a circuit diagram; however as products became more complex this information...
