The International Guide to Student Achievement brings together and critically examines the major influences shaping student achievement today. There are many, often competing, claims about how to enhance student achievement, raising the questions of "What works?" and "What works best?" World-renowned bestselling authors, John Hattie and Eric M. Anderman have invited an international group of scholars to write brief, empirically-supported articles that examine predictors of academic achievement across a variety of topics and domains. Rather than telling people what to do in their schools and classrooms, this guide simply provides the first-ever compendium of research that summarizes what is known about the major influences shaping students' academic achievement around the world. Readers can apply this knowledge base to their own school and classroom settings. The 150+ entries serve as intellectual building blocks to creatively mix into new or existing educational arrangements and aim for quick, easy reference. Chapter authors follow a common format that allows readers to more seamlessly compare and contrast

information across entries, guiding readers to apply this knowledge to their own classrooms, their curriculums and teaching strategies, and their teacher training programs.

Divergent EDU: Challenging Assumptions and Limitations to Create a Culture of Innovation

Independent Learner

The concept of being innovative can be made to sound so simple. We think of a new idea. We take a risk and implement the new idea. We fail, learn, and move forward. But what if the development of the innovative thinking isn't the only roadblock? What if so much of your day is spent solving the issues around you that even the attempt at developing new ideas is not even on your radar? What if you long to have more divergent teachers in your school district or to be that divergent teacher, but you simply don't know where to start? This is where I was as a Technology Integrator several years ago. I knew what innovative teaching looked like, but I didn't know how to support all the other areas that were taking teachers' away from having the time and the brain space to think innovatively and divergently. After working with multiple educators, schools, and districts, I have developed the foundational levels to the Hierarchy of Needs for Innovation and Divergent Thinking in hopes that the information will help educators find the holes in their foundational levels and fill them. When educators are supported, amazing learning opportunities can happen, and a solid foundation allows for more time to try new ideas, challenge their own assumptions, and teach divergently \"As someone who has the chance to visit with many different kinds of school districts, I can tell you culture looks different and has varying degrees of denotations from building to building. Defining culture and how it's formed is difficult for most to even articulate. But that's where Divergent EDU comes in. Mandy gives us a solid understanding of each critical piece that must be addressed in order to positively impact a building's culture. Use this book as a reflective tool and you will start to see where your culture is strong, but where it could also be strengthened.\" - Jarod Bormann \"I absolutely loved reading this book and thought it was so well written and clear, inspiring and conveys the message that we need to push ourselves to be different, to take risks and be comfortable with diverging from the way things have been done. The structure of the book, the flow of the writing and the

guide/ roadmap that Mandy provides for moving up the hierarchy are so well done. The way that it progresses from start to finish in explaining the hierarchy and the divergent thinking process, how to make changes, how to encourage others to join in the work to bring about the changes needed in education, I have no doubt that educators can feel confident using this book as a guide and will have the support they need. I enjoyed reading and learning through Mandy's experience, hearing about some of the challenges, and resulting triumphs and failures. One of the best features of book is the way that Mandy narrates and shows vulnerability, and really models that power of being reflective in our practice. Each chapter having a summary and points to keep in mind as well as questions to use for reflection are also some of the best features of this book. \" - Rachelle Poth
