A Practical Guide to Localization was written for technical translators, localization engineers, testing engineers, desktop publishers, project managers, and anyone else who may be involved in the release of multilingual products. In this second edition, translators can learn more about localizing software, online help and documentation files, and the latest translation technology tools. Localization engineers can learn all about developing, engineering, and testing multilingual software and online help projects. For project managers, there is all the information needed for planning translation and localization projects, finding resources, and ensuring product quality. New to this second, fully updated and revised edition are chapters on internationalization, multilingual desktop publishing, and software quality assurance. The book has been designed both as a reference work and a teaching tool. Visit the [www.locguide.com](http://www.locguide.com) web site for additions and updates to the book, as well as references and links relevant to technical translation and localization. The web site also contains extracts from the book, reviews, and ordering information. Bert Esselink has been active in localization for over a decade. After graduating in technical translation and taking university classes in programming and computational linguistics he worked for several years as software localizer, localization engineer, and technical project manager at International Software Products. In 1996 he joined ALPNET in Amsterdam as localization manager before taking on the role of globalization manager, developing internal production quality standards. In January 2000 Bert joined Lionbridge to head up their European globalization consulting services.

Writing as Material Practice grapples with the issue of writing as a form of material culture in its ancient and more recent manifestations, and in the contexts of production and consumption. Fifteen case studies explore the artefactual nature of writing — the ways in which materials, techniques, colour, scale, orientation and visibility inform the creation of inscribed objects and spaces, as well as structure subsequent engagement, perception and meaning making. Covering a temporal span of some 5000 years, from c.3200 BCE to the present day, and ranging in spatial context from the Americas to the Near East, the chapters in this volume bring a variety

of perspectives which contribute to both specific and broader questions of writing materialities. The authors also aim to place past graphical systems in their social contexts so they can be understood in relation to the people who created and attributed meaning to writing and associated symbolic modes through a diverse array of individual and wider social practices.

D.R. Brothwell and A.M. Pollard have got together to create the first large scale review of the many sciences which contribute to modern archaeology for over 30 years. The Handbook of Archaeological Sciences is intended to bring together a substantial overview of the sciences in archaeology in one complete volume. The book is organised under eight broad headings: dating, quaternary palaeoenvironments, human palaeobiology, developments in biomolecular archaeology, resource exploitation, archaeological prospection, conservation science in the archaeological context and statistical and computer applications. The contributors, who are all well-known in their own areas of expertise, bring together in each chapter the basic science and the relevance of this science to the overall goal of archaeology - understanding humans in the past. This book is an invaluable source of reference for those interested in

archaeology, anthropology, quaternary studies, geography, palaeoecology, computing, biology, chemistry and physics, those involved in commercial and local authority field archaeology units, museums and archaeological organisations.

The Bash Guide for Beginners (Second Edition) discusses concepts useful in the daily life of the serious Bash user. While a basic knowledge of shell usage is required, it starts with a discussion of shell building blocks and common practices. Then it presents the grep, awk and sed tools that will later be used to create more interesting examples. The second half of the course is about shell constructs such as loops, conditional tests, functions and traps, and a number of ways to make interactive scripts. All chapters come with examples and exercises that will help you become familiar with the theory.

This important and useful book offers a clear and comprehensive foundation for research methods in industrial and organizational (I-O) psychology. The text provides readers with a key understanding of the research, theory, and practice needed towards becoming a research methods expert. The use of trustworthy and rigorous research methods is foundational to advancing the science of industrial and organizational psychology and its practice in the \_eld. Understanding this, the authors have paired straightforward, plainly written explanations in a conversational tone with illuminating diagrams and illustrations. Many descriptions are followed by in-depth demonstrations and examples from relevant software, including SPSS, R, and even Excel when it's the best option available. Insightful and accessible, the text covers the full gamut of I-O research methods, from theory to practice and everywhere between. Paired with a detailed instructor's manual, this book serves as a gentle but thorough introduction to the complex world of research methods in I-O psychology for both master's and Ph.D. students, as well as researchers, academics, and practitioners.

## **The Writer's Market**

The European film industry has by now lost most of its audience to American films; US productions take around eighty per cent of Europe's box-office revenues. There are many reasons for this imbalance, but one major difference between the European and the US film industries is easily identified: the Americans spend far more on development. *Developing Feature Films in Europe* is the first comprehensive study of this critical stage of the film-making process. Based on extensive research and interviews with more than seventy industry practitioners, it examines current funding practices, presents training initiatives for writers and producers, and highlights the potential for further improvements. Angus Finney has also compiled an invaluable directory of contacts, addresses and application procedures for public and private funding bodies throughout Europe.
