

Driver Operator 1a Study Guide

9M133 Kornet

Ukraine. Since Ukraine is not a known operator of Kornet, Reuters quoted the International Institute for Strategic Studies that the missiles were most likely

The 9M133 Kornet (Russian: Корнет; "Cornet", NATO reporting name AT-14 Spriggan, export designation Kornet-E) is a Russian man-portable anti-tank guided missile (ATGM) intended for use against main battle tanks. It was first introduced into service with the Russian army in 1998.

The Kornet has been widely exported and is produced under license in several countries. It was first used in combat in 2003 and has since been used in many conflicts.

BRDM-2

BRDM-2 armored scout vehicles. It has a four-person crew (driver, commander, radio operator, and gunner). This variant is also known as the BRDM-2D, where

The BRDM-2 (Boyevaya Razvedyvatelnaya Dozornaya Mashina, Боевая Разведывательная Дозорная Машина, literally "Combat Reconnaissance/Patrol Vehicle") is an amphibious armoured scout car designed and developed in the Soviet Union. It was also known under the designations BTR-40PB, BTR-40P-2 and GAZ 41-08. This vehicle, like many other Soviet designs, has been exported extensively and is in use in at least 38 countries. It was intended to replace the older BRDM-1, and has improved amphibious capabilities and better armament compared to its predecessor.

Construction of I-496 started in 1963, and the freeway opened on December 18, 1970. Segments of the freeway south of downtown Lansing were built in...

The LRT (narrow profile) and MRT (wide profile) lines operate on standard gauge (1,435 mm (4 ft 8+1/2 in)) rail, while the KL Monorail operates on an ALWEG straddle beam. Train services operate from 6:00 a.m. and typically end before midnight daily, with frequencies varying from approximately three minutes during peak hours to fourteen...

Headphones are a pair of small loudspeaker drivers worn on or around the head over a user's ears. They are electroacoustic transducers, which convert

Headphones are a pair of small loudspeaker drivers worn on or around the head over a user's ears. They are electroacoustic transducers, which convert an electrical signal to a corresponding sound. Headphones let a single user listen to an audio source privately, in contrast to a loudspeaker, which emits sound into the open air for anyone nearby to hear. Headphones are also known as earphones or, colloquially, cans. Circumaural (around the ear) and supra-aural (over the ear) headphones use a band over the top of the head to hold the drivers in place. Another type, known as earbuds or earpieces, consists of individual units that plug into the user's ear canal; within that category have been developed cordless air buds using wireless technology. A third type are bone conduction headphones, which...

Rapid Rail Sdn Bhd is the operator of the rapid transit (metro) system serving Kuala Lumpur and the Klang Valley area in Malaysia. A subsidiary of Prasarana

Rapid Rail Sdn Bhd is the operator of the rapid transit (metro) system serving Kuala Lumpur and the Klang Valley area in Malaysia. A subsidiary of Prasarana Malaysia, it is the sole operator of five rapid transit lines which collectively form the Rapid KL rapid transit system. The system currently consists of three light rapid transit (LRT) lines, two mass rapid transit (MRT) lines and a monorail line, with another MRT and LRT line currently under

construction.

Capitol Loop

2010. Leach, Hugh (April 5, 2004). "Downtown Drivers Brace for Delays Today". Lansing State Journal. pp. 1A, 6A. ISSN 0274-9742. OCLC 6678181. Retrieved

The Capitol Loop was a state trunkline highway running through Lansing, Michigan, in the United States that was commissioned on October 13, 1989. It formed a loop route off Interstate 496 (I-496) through downtown near the Michigan State Capitol complex, home of the state legislature and several state departments. The Michigan Department of Transportation (MDOT) had labeled it as Capitol Loop I-496 or CL I-496 on some maps, similar to the Business Loop Interstate nomenclature. However, unlike other business loops in Michigan, it had unique reassurance markers—the signs that served as regular reminders of the name and number of the highway. It was known internally at MDOT as Connector 496 for inventory purposes. The route followed a series of one-way and two-way streets through downtown Lansing...

In 2016, the transit agency started a rebranding campaign to highlight its Cherriots operating name. All of its services now bear the Cherriots name. For example, a regional bus service previously called CARTS (Chemeketa Area Regional Transportation System) is now...

Cherriots

replaced on February 2 by Capital Transit, an independent operator founded by former City Transit drivers and mechanics. In its six years of operation, Capital

Cherriots, officially the Salem Area Mass Transit District, is a public transit operator based in Salem, Oregon, United States. The agency, whose name refers to the city's nickname (The Cherry City), provides bus and paratransit service in Salem and neighboring Keizer. It was founded in 1979 as the

Salem Area Mass Transit District, replacing municipal and private systems, and renamed itself to Salem-Keizer Transit in 2003. In 2024, the system had a ridership of 3,416,400, or about 19,300 per weekday as of the first quarter of 2025.

Interstate 496

"Drivers on I-496 Get the Green Light to Go 70: Stretch of US 127 in Frandor Area Seed Higher Speed Limits as Well". Lansing State Journal. pp. 1A, 7A

Interstate 496 (I-496) is an auxiliary Interstate Highway that passes through downtown Lansing in the US state of Michigan. Also a component of the State Trunkline Highway System, the freeway connects I-96 to the downtown area. It has been named the R.E. Olds Freeway (sometimes just Olds Freeway) for Ransom E. Olds, the founder of Oldsmobile and the REO Motor Car Company. I-496 runs east-west from I-96/I-69 near the downtown area and north-south along a section that runs concurrently with US Highway 127 (US 127). The trunkline also passes a former assembly plant used by Oldsmobile and runs along or crosses parts of the Grand and Red Cedar rivers.

The Kornet is among the most capable Russian ATGMs. It was further developed into the 9M133 Kornet-EM, which has increased range, an improved warhead, and equipped with an automatic target tracker.

Voicemail can be used for personal calls, but more complex systems exist for companies and services to handle the volume of customer requests. The term is also used more broadly to denote any system of conveying stored telecommunications voice messages, including using older technology like answering machines.

Assured clear distance ahead

force without regard to a statutory promulgation to the effect that drivers or operators of vehicles, and more particularly motor vehicles, must be

specially

In legal terminology, the assured clear distance ahead (ACDA) is the distance ahead of any terrestrial locomotive device such as a land vehicle, typically an automobile, or watercraft, within which they should be able to bring the device to a halt. It is one of the most fundamental principles governing ordinary care and the duty of care for all methods of conveyance, and is frequently used to determine if a driver is in proper control and is a nearly universally implicit consideration in vehicular accident liability. The rule is a precautionary trivial burden required to avert the great probable gravity of precious life loss and momentous damage. Satisfying the ACDA rule is necessary but not sufficient to comply with the more generalized basic speed law, and accordingly, it may be used as both...

Interstate 270 (Ohio)

Truckers”*. Columbus Dispatch. February 4, 1974. p. 1A. “Fiery gasoline-tanker crash kills driver, shuts Route 33, I-270”*. *Columbus Dispatch. January*

Interstate 270 (I-270) is an auxiliary interstate highway that forms a beltway loop freeway in the Columbus metropolitan area in the US state of Ohio, commonly known locally as The Outerbelt or the Jack Nicklaus Freeway. The zero-milepost is at the junction with Interstate 71 east of Grove City, intersecting with I-71 again near Worthington as well as connecting with Interstate 70 twice with the western junction near Lincoln Village and the eastern junction near Reynoldsburg. The route furthermore links to the eastern terminus of Interstate 670 near Gahanna and provides indirect access to John Glenn Columbus International Airport. The entire length of I-270 is 54.97 miles (88.47 km). It is one of four Interstate loops not to run concurrently with another Interstate freeway, the others being...

Voicemail

GEC in the United Kingdom.[citation needed] AT&T developed a system called 1A Voice Storage System to support custom services including

voicemail for the

A voicemail system (also known as voice message or voice bank) is a computer-based system that allows callers to leave a recorded message when the recipient has been unable (or unwilling) to answer the phone. Calls may be directed to voicemail manually or automatically. The caller is prompted to leave a message that the recipient can retrieve at a later time.
