

An Introduction To Astronomy And Astrophysics By Pankaj Jain

List of unsolved problems in physics

Astronomy & Astrophysics. 367 (2): 381–387. *arXiv:astro-ph/0012182*.

S2CID 17157567. Jain

The following is a list of notable unsolved problems grouped into broad areas of physics.

Some of the major unsolved problems in physics are theoretical, meaning that existing theories are currently unable to explain certain observed phenomena or experimental results. Others are experimental, involving challenges in creating experiments to test proposed theories or to investigate specific phenomena in greater detail.

A number of important questions remain open in the area of Physics beyond the Standard Model, such as the strong CP problem, determining the absolute mass of neutrinos, understanding matter–antimatter asymmetry, and identifying the nature of dark matter and dark energy.

Another significant problem lies within the mathematical framework of the Standard Model itself, which remains...
